Education

Dhirubhai Ambani Institute of Information and Communication Technology

2024 – 2026

M.Sc. Information Technology CPI: 7.23

Gandhinagar, Gujarat

GLS University

2021 – 2024

Bachelor of Computer Applications CGPA: 8.24

Ahmedabad, Gujarat

Experience

Software Engineer Intern

Jan 2026 – Apr 2026

Oizom

Ahmedabad, India

- Built **Envizom**, an SVG charting library with a dual-runtime renderer producing identical output in the browser and on the server via Node.js.
- Designed a declarative, config-driven API that decouples chart configuration from rendering logic, enabling consistent cross-environment behavior.
- Implemented data-reduction strategies to keep large time-series datasets performant at render time without sacrificing visual fidelity.

Software Development Intern

Jul 2023 – Feb 2024

Inexture Solutions LLP

Ahmedabad, Gujarat

- Developed **SoleStore**, a full-stack e-commerce footwear platform as part of a 3-member team under industry mentorship.
- Conducted requirements gathering, system analysis, and designed UML diagrams for system architecture and workflows.
- Implemented product catalog, authentication, and order management modules following SDLC best practices.

Projects

Resume Ranker | SvelteKit, FastAPI, PostgreSQL, Redis, Docker

- Built a resume-screening tool that produces section-by-section match analyses with side-by-side evidence quotes from both the resume and the job description — no single top-line score.
- Designed a three-step LLM pipeline (JD extraction → resume extraction → scoring) with typed, validated outputs via **instructor + Pydantic**, and SHA-256-keyed **Redis** caching to eliminate redundant API calls.
- Decoupled the API from LLM inference using **arq** task queues — the FastAPI server validates, persists to **PostgreSQL**, and enqueues; a separate worker process handles all model calls.
- Containerized both stacks independently (4-container backend compose, standalone frontend image) with resource caps, sliding-window rate limiting, and a stub mode for offline development.

Technical Skills

Languages: C / C++, Go, Linux, Python

Frameworks: FastAPI, Django REST Framework

Cloud & Infra: AWS, Docker, Terraform

Databases: PostgreSQL, MySQL, Redis

Developer Tools: Git, GitHub Actions

Interests: Backend Engineering, Cloud Infrastructure, System Design
