Education

Dhirubhai Ambani Institute of Information and Communication Technology

M.Sc. Information Technology GPA: 7.23/10

2024–2026

Gandhinagar, Gujarat

GLS University

Bachelor of Computer Applications GPA: 8.24/10

2021–2024

Ahmedabad, Gujarat

Experience

Software Engineer Intern

Jan 2026 – Apr 2026

Oizom

Ahmedabad, India

- Built **Envizom**, a dual-engine SVG charting library using **D3.js** and **TypeScript** for interactive client-side visualizations, alongside a pure **Go** implementation for generating static server-side reports and exports.
- Designed a declarative, configuration-driven rendering API that ensured pixel-perfect SVG parity across the TypeScript frontend and Go backend using a shared rendering specification.
- Engineered deterministic downsampling and data-reduction algorithms to efficiently render large time-series datasets while preserving visual fidelity and responsiveness.

Software Development Intern

Jul 2023 – Feb 2024

Inexture Solutions LLP

Ahmedabad, Gujarat

- Developed **SoleStore**, a full-stack e-commerce platform supporting authentication, product management, shopping cart, and order processing as part of a three-member development team.
- Designed UML class, sequence, and activity diagrams to model application architecture, business workflows, and system interactions before implementation.
- Implemented core backend modules including product catalog, authentication, and order management while following SDLC best practices and collaborative development workflows.

Projects

Resume Ranker | Go, Python, gRPC, PostgreSQL, Docker, LLMs

- Built an AI-powered candidate evaluation platform using JWT authentication and PostgreSQL audit logging.
- Reduced LLM hallucinations by requiring every evaluation score to include supporting resume citations, while parallelizing model requests with **asyncio.gather** to reduce inference latency by 50%.
- Designed a distributed architecture where a **Go** API gateway delegates AI workloads to a dedicated **Python** service over **gRPC** using strongly typed **Protobuf** contracts.
- Validated structured model outputs using **Instructor** and **Pydantic**, ensuring deterministic JSON responses for downstream HR systems.

DepCycle | Python, AST, Graphviz, Static Analysis

- Built a Python CLI for static dependency analysis, identifying circular imports and visualizing architectural coupling across large codebases.
- Implemented a static analysis engine using Python's **ast** module to accurately resolve absolute, relative, and dotted imports without executing application code.
- Generated interactive dependency graphs and isolated subgraphs in HTML, PNG, and SVG formats using Graphviz to simplify architecture exploration.

Placemate | Django, Django REST Framework, PostgreSQL, Cloudinary, Render

- Built a scalable backend for a centralized campus recruitment platform using Django REST Framework, automating campus placement workflows.
- Implemented secure JWT authentication with HTTP-only cookies, Role-Based Access Control (RBAC), and object-level permissions to enforce fine-grained authorization while mitigating XSS risks.
- Designed reusable middleware and BaseViewSets to standardize API responses, centralize exception handling, and simplify endpoint development.
- Deployed the backend on Render, configuring PostgreSQL, environment management, and Cloudinary integration for scalable media storage.

Technical Skills

Languages: Go, Python, SQL

Frameworks: FastAPI, Django REST Framework

Cloud & DevOps: Linux, Docker, AWS (EC2, S3, IAM), Oracle Cloud

Databases: PostgreSQL, MySQL, Redis

Tools: Git, GitHub Actions, Terraform
